PCI Pal® Appoints Mufti Monim as New CTO
Former Deko and Lebara Money CTO will spearhead technology strategy and innovation

London, UK April 13, 2021 -- PCI Pal®, the global cloud provider of secure payment solutions for business communications, today announced the appointment of Mufti Monim as Chief Technology Officer to direct the strategic technical vision for the company.

Mufti joins PCI Pal from Deko, the retail finance cloud technology provider where, as CTO, he led the product and engineering teams, developing a market leading platform used by more than 1700 merchants and processing more than 2 million credit applications, worth in excess of £2bn. Prior to working at Deko, Mufti was Head of Technology at Lebara Money, where he created an international money transfer platform, achieving £100 million worth of transfers within its first 12 months of operation. Previously, Mufti had worked in various roles at Lebara Mobile, including Head of Digital Technology.

Working with PCI Pal's leadership team and reporting to CEO James Barham, Mufti will use his extensive expertise and experience within cloud and payments technologies to further advance the company's goal to be the preferred solution provider that organisations turn to globally for achieving payment security within customer engagement environments.

As well as spearheading technology strategy, Mufti will lead the newly formed product team at PCI Pal in the identification and development of future product enhancements and features as the Company seeks to capitalise on the opportunities before it in its fast-moving global market.

"It is such an exciting time for me to be joining this high-growth cloud payment security business. Having established itself as the market leader for cloud solutions in its space, I'm thrilled to add my expertise in these areas to the existing management team at PCI Pal, and I see significant opportunities long into the future for both its technology and products," said Mufti. "My previous two leadership roles have been at high-growth companies too, and I feel PCI Pal is at a hugely interesting stage of its development having established significant foundations for its cloud business globally to date."

"With Mufti's hugely relevant cloud and payments background, plus his clear focus and drive as a high-energy technology leader, I believe that he will play a big part in the next evolutionary step in executing our technical vision and, longer-term, our product innovation capabilities," said James Barham, CEO, PCI Pal. "We are very excited to have Mufti join the PCI Pal family and can't wait to see what we will accomplish together."

About PCI Pal
PCI Pal is a leading provider of SaaS solutions that empowers companies to take payments securely, adhere to strict industry governance, and remove their business from the significant risks posed by non-compliance and data loss.

Our mission at PCI Pal is to safeguard reputation and trust by providing our customers with secure payment solutions for any business communications environment including voice, chat, social, email, and contact center.

We are integrated to, and resold by, some of the worlds' leading business communications vendors, as well as major payment service providers.

The entirety of the product-base is available from our global cloud platform hosted in Amazon Web Services ("AWS"), with regional instances across EMEA, North America, and ANZ. PCI Pal products can be used by any size organisation globally, and we are proud to work with some of the largest and most respected brands in the world.
